PROFESSIONAL SUMMARY

Junior Software Tester with 1 year 4 months of hands-on experience delivering quality assurance on live healthcare and SaaS web applications. Proficient in Functional, Regression, API, and Performance Testing using Postman, JMeter, and JIRA. Experienced in executing end-to-end test coverage across complex multi-role workflows in Agile/Scrum environments, supporting multiple production releases. Building automation expertise in Playwright (JavaScript), including Page Object Model (POM), assertions, fixtures, and hooks.

WORK EXPERIENCE

Junior Software Tester | Wonder Worth Solutions Pvt Ltd

July 14, 2024 – Present | Vellore, Tamil Nadu | Domain: Healthcare & SaaS | Agile / Scrum Environment

- Executed 200+ functional, regression, smoke, sanity, and compatibility test cases across 3 live production web applications, ensuring complete positive, negative, and edge-case scenario coverage.
- Validated 55+ REST and GraphQL API endpoints using Postman, verifying request/response behaviour, status codes, error handling, and data accuracy prior to every release cycle.
- Designed and ran JMeter performance test suites, analysing system throughput, response times, and stability under simulated load — identified and reported bottlenecks before go-live.
- Logged, tracked, and managed 60+ defects end-to-end in JIRA following the complete defect lifecycle.
- Collaborated with developers and business stakeholders in Agile sprint cycles to review requirements, align test coverage with acceptance criteria, and support timely, compliant releases.
- Designed structured test cases covering end-to-end billing workflows, role-based access control, and eSignature processes — ensuring compliance with US healthcare data standards.
- Building Playwright (JavaScript) automation scripts using Page Object Model (POM), assertions, fixtures, and hooks to expand regression test coverage and reduce manual testing effort.

PROJECTS

BM – US Medical Billing Application *— Healthcare / Revenue Cycle Management*

- Tested end-to-end RCM workflows including insurance verification, claim processing, auditing, and AR follow-up across functional, API, and performance test suites.
- Validated data accuracy across complex multi-step billing transactions ensuring full compliance with US healthcare standards — zero critical defects post-release.

Nexus – Provider / Patient / Physician Application *— Healthcare / eSignature*

- Validated role-based access control and eSignature workflows for 3 user roles (provider, patient, physician), identifying and preventing unauthorised document access issues.
- Executed functional and regression test suites covering order creation and referral workflows across multiple sprint releases.

Neutix – Project Management Application *— SaaS / Web*

- Performed functional and API testing on task-tracking and workflow management modules, verifying end-to-end reliability across all key user journeys.
- Conducted GraphQL API performance testing using JMeter, evaluating response times, throughput, and system stability — established pre-deployment load benchmarks.

WWS Corporate Website – Wonder Worth Solutions *— Marketing / Public Website*

- Performed end-to-end functional testing of the company's public website — covering Home, Who We Are, Services (RCM, Credentialing & Contracting, Consulting), Pricing, Resources, and Contact sections — validating each page against approved UI/UX designs and business requirements.
- Verified functional accuracy of interactive elements including the newsletter subscription form, CAPTCHA validation, service CTAs, and partner/testimonial sections, ensuring behaviour matched defined acceptance criteria.
- Conducted cross-browser and responsive testing across desktop and mobile breakpoints to ensure consistent layout, navigation, and content accuracy across devices.

TECHNICAL SKILLS

Testing Types: Functional, Regression, Compatibility, Smoke, Sanity, UAT, API Testing, Performance Testing

Tools & Apps: Postman, JIRA, JMeter, Git, MS Excel

Automation: Playwright (JavaScript) — POM, Assertions, Fixtures, Hooks

Cloud & Data (Learning): Azure Data Engineering (Learner) — exposure to Azure Data Factory (ADF) and Resource Groups

Methodologies: Agile / Scrum, Defect Lifecycle Management, Test Case Design, Test Planning

Programming: JavaScript, SQL

Platforms: REST APIs, GraphQL APIs, Web Applications, Cross-browser Testing

EDUCATION

B.Tech – Information Technology | May 2024
Veltech Multitech Dr Rangarajan Dr Sakunthala Engineering College, Avadi | CGPA: 7.53

12th Standard (HSC) | March 2020
Saraswathi Vidyalaya Matric Hr Sec School, Kaveripakkam | 69.5%

CERTIFICATIONS

- MasterClass: Software Testing with Jira & Agile — Udemy
- JMeter Performance Testing — Udemy
- Master API Testing: REST & GraphQL using Postman — Udemy
- MySQL Basics — Great Learning
- Cambridge Business English Certificate (BEC Preliminary — B1 Level) | Score: 140/170

ACHIEVEMENTS & ACTIVITIES

- Awarded Cambridge Business English Certificate Preliminary (B1 Level) with a score of 140/170, demonstrating professional-level English communication skills.
- Participated in Technical Symposium at RMD Engineering College, Thiruvallur, showcasing technical initiative and interest beyond core curriculum.

ADDITIONAL INFORMATION

Languages: Tamil (Native), English (B1 — Cambridge Certified), Hindi (Proficient)

Work Preference: Full Time | On-site (Chennai) / Remote / Hybrid
